Ba

Collect Coins V2

What's new?

In the new version of the game, the player is stronger and gets a player's health status. Enemies will now not defeat the player with a single hit. If the player is about to die look for the heart icon and heal. But the enemies also got stronger and now you need three bullets to kill the enemies. Don't worry, look for the missile in the game and you can launch missiles at the enemies. And most importantly don't forget the thorns that chase the player. a little touch and you lose.

Successfully!!!

Keys:

Right arrow – move to the right

Left arrow – move to the left

Space key – jump.

Z key – shoot.

X key – change weapons (only after getting the missile)
